

Manhole Chamber

• Main Description:

RF-MH220 is made of composite reinforced materials. As an underground facility, it has very good waterproof permeability and corrosion resistance, with high material strength and weather stability. Corrosion resistance and low water absorption. High and low-temperature applications. Ours assemble SMC manhole is extremely flexible and has no risk of crushing, ensuring safe use.

Technical Parameters

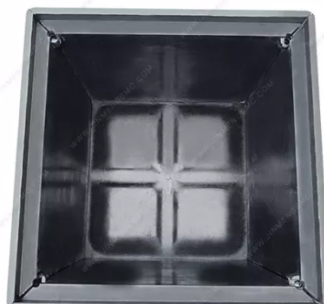

Product Code	Clear Opening (O)	Cover Size (D)	Over Base (F)	Depth (H)	Cover Depth (h)	Class	Features
RF-FB-MH220	450x450	500x500	545x545	455	25	A15	Screw Lock & Weight 25.2kg
