

Round Manhole Covers

Main Description:

RF-FB-MR102 : Lightweight composite manhole covers are extremely durable and lightweight, weighing three times lighter than steel and iron, and four to five times lighter than concrete-so they can be carried by one person, thus avoiding the risk of operator injury. Especially for local governments and public utility companies that are short of funds, this may save huge costs.

shock absorption by Rubber

surface pattern and other customization service is supported

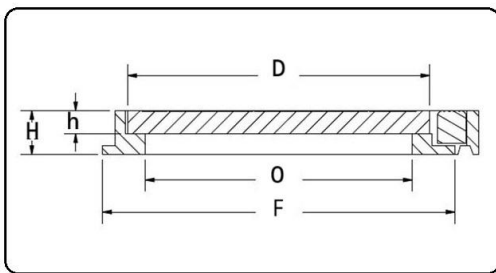

high anti-corrosion performance

high wear resistance performance

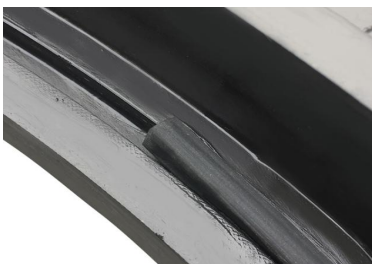

Technical Parameters:

Product Code	Clear Opening (O)	Cover Size (D)	Over Base (F)	Depth (H)	Cover Depth (h)	Class	Hinge	Features
